## SUMMARY

MERN Stack Developer proficient in building secure, real-time web applications using **React, Node.js, MongoDB,** and **Express.js** with practical knowledge of **REST APIs**, real-time communication (**Socket.IO**), and secure authentication (**JWT**). Focused on writing clean, maintainable code and applying strong problem-solving skills to deliver optimized user experiences.

## SKILLS

- **Frontend:** React, Redux, React Router, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Material UI, Bootstrap
- **Backend & Databases:** Node.js, Express.js, MongoDB, REST APIs, Socket.IO, JWT, NoSQL
- **Languages & Tools:** Java, C++, Python, Data Structures & Algorithms (DSA), OOP, Git, GitHub, Firebase, Postman

## EXPERIENCE & TRAINING

**Newton School** 2022 – 2023
*Full-Stack Developer Bootcamp*

- Developed and deployed modern frontend architectures using React, Redux, and React Router.
- Strengthened core programming logic and algorithmic problem-solving through rigorous coursework in Java and Data Structures & Algorithms (DSA).
- Designed and built scalable, user-centric web applications, gaining hands-on experience across the complete software development lifecycle.

## PROJECTS

**Talk to Me – Real-time Chat Application** | Live | GitHub

- **Tech:** React, Node.js, Express.js, MongoDB, Socket.IO, Firebase, React Router, REST APIs, Tailwind CSS
- Built and deployed a full-stack chat system enabling live conversations with support for both private and group messaging.
- Designed a secure authentication system utilizing JWT and Firebase OAuth, enabling email/password + Google login.
- Integrated Socket.IO-based bidirectional communication, optimizing event handling and supporting seamless messaging for multiple concurrent users.

**Amazon Clone – E-commerce Platform** | Live | GitHub

- **Tech:** React, Redux, React Router, Tailwind CSS, Material UI, Firebase
- Developed a responsive e-commerce interface replicating Amazon's core features (search, cart, wishlist, checkout flow).
- Integrated Firebase authentication (email/password and Google), enabling secure user profile management and persistent cart states.
- Implemented global state management using Redux, optimizing cart updates and user session handling.

**Event Management System – Enterprise API** | GitHub

- **Tech:** Node.js, Express.js, MongoDB, JWT, Zod, Bcryptjs
- Architected a highly scalable backend REST API using a Feature-Based Module Pattern to ensure codebase resilience and maintainability.
- Engineered a secure, fault-tolerant request pipeline by integrating granular Role-Based Access Control (RBAC), JWT authentication, and strict Zod validation.
- Optimized server performance by implementing Node.js cluster mode, distributing load across multi-core CPU architectures to maximize high-concurrency throughput.

## EDUCATION

**Bachelor of Technology (B.Tech), Computer Science and Engineering** 2016 – 2020
*Sam Higginbottom University of Agriculture, Technology and Sciences, Prayagraj (UP)*

## CERTIFICATIONS & ACHIEVEMENTS

- Solved 200+ algorithmic problems on LeetCode, strengthening problem-solving and data structures expertise.
- Certificate of Completion for Alpha course (DSA with Java) – Apna College.
